HOSPITALITY

Furniture, Joinery & Project Coordination

Selected capabilities and manufacturing-network references
for hotels, serviced apartments and branded residences.

EUROPE - TÜRKİYE

2026

One coordination point. Flexible production capacity.

For European hospitality teams, sourcing from Türkiye can create two recurring risks: remote quality control and uncertain delivery ownership.

YG Architecture resolves both through a single accountable interface for technical, commercial and delivery coordination.

YG Architecture

Architecture, project coordination and client interface for hospitality furniture, joinery and FF&E packages.

01 Project-specific

The production team is selected according to scale, detail level and programme.

02 Transparent

Manufacturing experience is presented as partner-network experience - not as YG-owned factories.

03 Controlled

Client communication, documentation and commercial flow remain coordinated through YG Architecture.

Detailed partner information is shared during supplier qualification.

From guestroom joinery to public-area furniture.

Defined packages can be coordinated from technical development through production and delivery.

01 Guestrooms & serviced apartments

Wardrobes, headboards, bedside units, luggage benches, desks and TV panels.

02 Kitchenettes & compact living

Integrated kitchenette units, storage systems and space-efficient joinery.

03 Doors & architectural joinery

Guestroom entrance doors, wall panels, internal cladding and bespoke details.

04 Loose furniture & upholstery

Beds, seating, tables, lounge pieces and project-specific upholstery.

05 Public areas & F&B

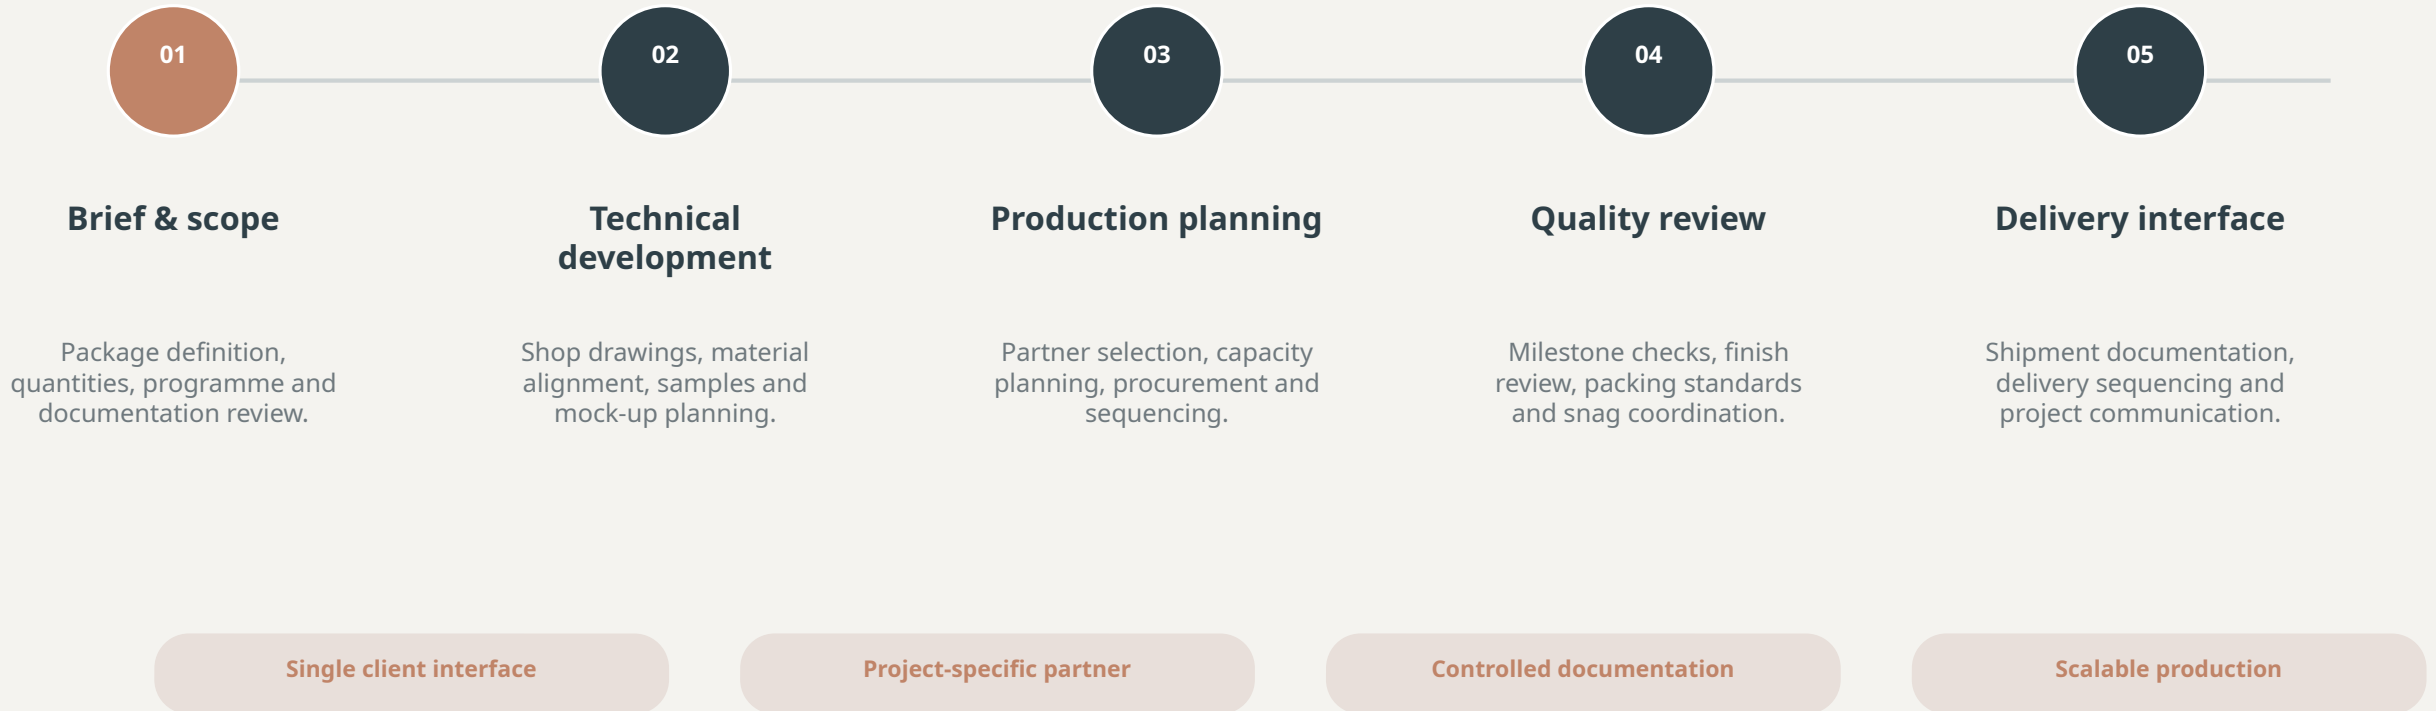

Lobby, restaurant, café, meeting and branded-residence common areas.

06 Technical coordination

Shop drawings, samples, mock-up coordination, quality review, packing and delivery planning.

Clear roles from brief to delivery.

A five-step workflow protects design intent, programme and commercial communication.

SELECTED MANUFACTURING NETWORK

Integrated capacity for contract furniture.

Access to fixed furniture, panel processing, upholstery, metalwork, finishing and stone-related production through selected partner facilities in Türkiye.

51,000 m²

combined partner-network
production footprint

430+

production specialists

3

integrated facilities

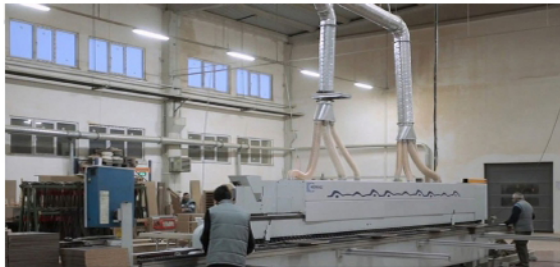

Figures reproduced from the manufacturing partner's current company presentation.

Selected partner-network production facility

Integrated production disciplines.

Selected workshop imagery from the project-specific manufacturing network.

Panel & CNC processing

Industrial panel cutting and precision machining

Metalwork & fabrication

Welding and mixed-material frame production

Finishing & spray systems

Controlled surface preparation and coating

Upholstery preparation

Frame, foam and pre-assembly workflows

01 Serial + bespoke

Repeatable production with project-specific detailing.

02 Mixed materials

Wood, metal, upholstery and specialist components.

03 Controlled finishes

Sample-led approval before serial release.

04 Project sequencing

Capacity aligned to milestones and delivery phases.

From forming to protected dispatch.

A coordinated path through shaping, finishing, packing and warehouse control.

Robotic shaping

Repeatable complex forms

Production-line finishing

Multi-stage surface systems

Material handling

Organised panel flow and machining

Packing & warehouse

Protection, labelling and phased dispatch

Production images are selected from partner-supplied materials. Manufacturing partner identities are disclosed only during qualified project discussions.

Cross-border delivery is not a new process.

Selected manufacturing partners have delivered large-scale hotel, office and F&B packages to distant markets, including Russia.

The same discipline is applied to European delivery planning: clear documentation, sequenced shipments and coordinated site teams.

01 Delivery planning

Package sequencing, loading plans and phased dispatch.

02 Export documentation

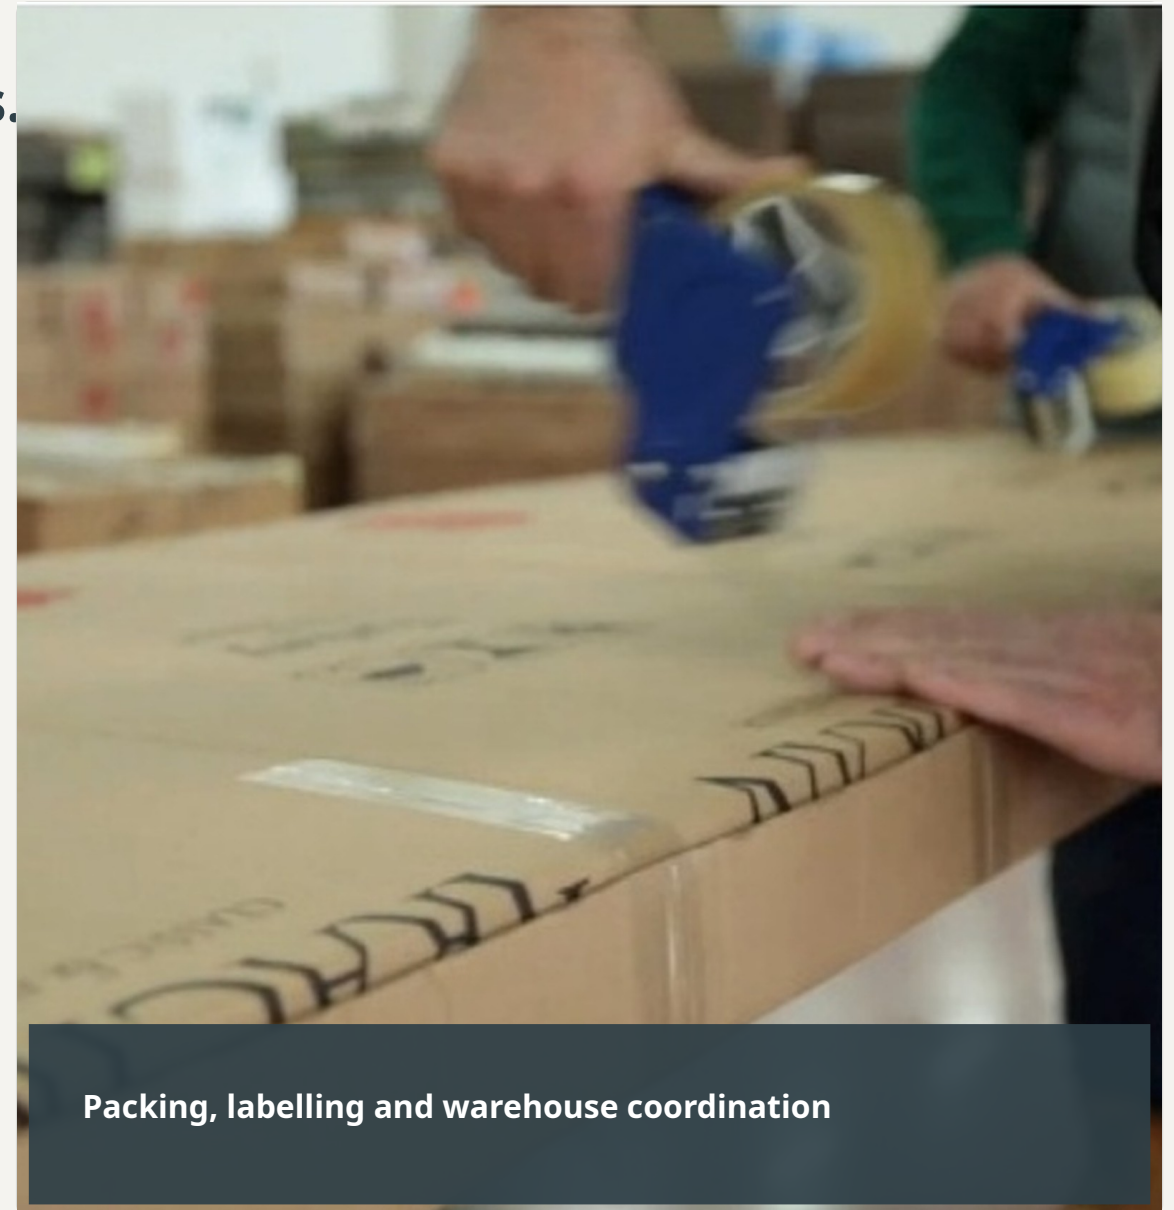

Commercial, packing and shipment records coordinated in advance.

03 Customs interface

Project documentation prepared for the appointed logistics route.

04 Site installation

Installation-team planning, access windows and snag coordination.

Verified evidence first. Project-specific documentation second.

Only confirmed claims are used in this introduction file.

VERIFIED REFERENCE EVIDENCE

90-minute fire-rated guestroom entrance doors

Applied on the Hilton Garden Inn, Balıkesir
reference project.

Project-specific test reports and valid certification
documentation are provided during supplier
qualification.

01 Materials & samples

Finish boards, hardware and project samples
aligned before production.

02 Mock-up review

Room or item prototype when required by the
project brief.

03 Qualification documents

Test reports, certificates and compliance
documents shared at the appropriate stage.

Hospitality, branded retail and international delivery.

Selected project references demonstrate scale, finish quality and cross-sector coordination.

Kempinski Residences Balmumcu

Istanbul - Fixed furniture across apartments, pentouses and villas

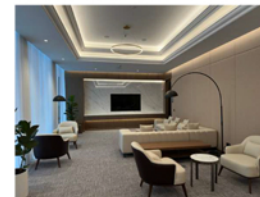

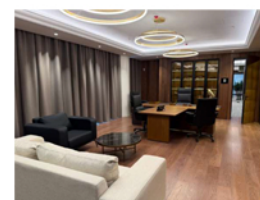

Beymen Galataport

İstanbul - Branded retail interiors

Rostec

International Office Environment
Cross-border and delivery coordination

One accountable interface from brief to delivery.

The value is not a single factory. It is controlled coordination across the right project-specific production team.

01 European-facing coordination

A single contact for technical, commercial and delivery communication.

02 Project-specific partner selection

Capacity and specialist disciplines matched to the package.

03 Transparent documentation

Partner identity and compliance records shared at qualification stage.

04 Scalable delivery model

Mock-up, production, packing and phased dispatch coordinated against the programme.

Single client interface · Controlled documentation · Project-specific production · Clear delivery ownership

Radisson Blu Hotel, Bursa

163 guest rooms - fixed and loose furniture production.

Manufacturing-network reference supplied by the selected production partner.

SCOPE

**Guestroom fixed furniture,
loose furniture and
coordinated room packages.**

163 guest rooms

Beymen Galataport, Istanbul

Bespoke retail furniture, metal fixtures and high-detail interior elements.

Manufacturing-network reference supplied by the selected production partner.

RETAIL PACKAGE

**Fixed and loose furniture,
display systems and
coordinated mixed-material
production.**

Kempinski Residences Balmumcu, Istanbul

High-volume fixed furniture across apartments, penthouses and villas.

Manufacturing-network reference supplied by the selected production partner.

SCOPE

Fixed furniture production and installation across multiple residential typologies.

120 standard apartments

11 duplex apartments

12 penthouses

11 villas

Nobu Restaurant, Moscow

Bespoke furniture and interior production for a demanding international F&B environment.

Manufacturing-network reference supplied by the selected production partner.

INTERNATIONAL DELIVERY CONTEXT

Project packaging, export documentation and coordinated site interface for high-detail interior works.

Hospitality, residence, retail and F&B experience.

Named references demonstrate the breadth of production experience within the manufacturing network.
